### The first United Nations Chiefs of Defence Conference in 2015. Results and experiences

ABSTRACT:

For today, the United Nations' peacekeeping activities became one of the most effective tools of the international community, which is operating to limit the burst of conflicts and restore peace. But what is the measure of success? How can one determine that a United Nations mission achieved its purpose? Not only the UN analyzed the factors and conditions of success, but also many other researcher had interest in clarifying the terms of the success itself. In my analysis, besides briefing the experience of the first United Nations Chiefs of Defence Conference in 2015, I highlight significant security threats and problems of the 21st century and present the United Nations operations' success and failure factors. Nevertheless, my purpose is to point out that promptly planned missions and quickly deployed United Nations forces can significantly lower the level of intervention and the associated resource requirements during the management of a region's conflicts.

KEYWORDS:

United Nations; peacekeeping; conference of CoDs; security challenges; international stabilization mechanisms; modernization.

### From Will to Act: the Structure of Carrying out Orders

ABSTRACT:

In my article I am focusing on a special aspect of military leadership which has earned little attention. This phenomenon is the special reason for carrying out military orders that orders give help for soldiers to answering their military reasons. In harmony with this claim I examine the compound structure of the reasons of carrying out military orders, which has three parts. These are: orders give help for soldiers to answering their military reasons; orders are issued only by people having proper military rank and status; and the proper rank and status were earned on the base of the honour of their bearer, or in the absence of the proper rank and status orders can be issued by people having military honour. These parts of the structure of the reasons for carrying out orders can be considered separately only by way of theoretical examination and in reality they constitute a unity.

KEY WORDS:

Moltke; order; honour; rank; military leadership.

Nagy, László

## The military science encyclopedia under preparation and the present position of the military science in Hungary

ABSTRACT:

The Hungarian Association of Military Science was planning from the very beginning the publication of an encyclopedia containing the terms of military science. The plan was realised in 1995. Nowadays there is on the agenda the publication of a new military science encyclopedia which is to be realised on the European Union's application base. The study deals with the details of the issues preparation works and it overviews – in connection with the encyclopedia – the present position of the military science in Hungary.

KEY WORDS:

military science; encyclopedia; military; redaction committee.

## SECURITY POLICY

Kiss, Petra

From co-operation to confrontation.

### The NATO–Russia relations in light of the Warsaw Summit

ABSTRACT:

2016 and the Warsaw Summit did not bring anything new in the bilateral relations of NATO and Russia, which have been frozen for the last few years. However, if we are reading the Summit Communique we can find - explicitly or implicitly - Russia and NATO's reaction on the eastern threats in the paragraphs. By examining the relations between NATO and Russia we cannot forget the fact that the security of Europe and the whole euro-atlantic area cannot be separated from Russia. Moreover, the security challenges of the 21<sup>st</sup> century indeed make it necessary to involve such a meaningful actor as Russia. Nonetheless, common actions or ad hoc cooperation do not require or presume common political goals, similar values and processes.

KEY WORDS:

NATO; Russia; conventional forces; exercises; Warsaw summit

## MILITARY TECHNOLOGY

Munk, Sándor

The appearance of information technology in the Hungarian People's Army. From the beginning until the establishment of the 12. separate department of the General Staff of HPA

ABSTRACT:

The information technology starting from the punched card technology, nowadays has reached all the organisations of the defence force, and entered the era of IT services available for any authorized persons of the force. The history of IT service in the Hungarian Army is still an unexplored territory in military science literature. This publication presents the background, causes, and circumstances of the formation of the first high level „IT” governing organisation 50 years ago.

KEY WORDS:

history of the Hungarian People's Army; history of the IT service in HPA; modernization of military management; automation of command and control.

Négyesi, Imre

## The automated team field command and control system history 1.

ABSTRACT:

In this article military land-based automation of tasks within the framework of the Warsaw Pact will be presented. The first section presents the field of automated systems management team to develop the historical antecedents, the concept of creation and the beginning of the development of the system.

KEYWORDS:

computers; information; management.

Hajdú, Ferenc – Bimbó, István

## Defence Research for the Faculty of Military Science and Military Officer Training Military Department in collaboration with the Ministry of Defense Office of Defense Economy

ABSTRACT:

This article shows a research that is taking place at the Military Technology Department of the National University of Public Services in cooperation with the Defence Economy Office of the Ministry of Defence. This research is based on the former results of the department. The aim is the testing of armor plate's defence capabilities. The topic of this paper is the definition of the fragment cone's attributes (geometry, moving skills, dispersion) which is developed at the impact of the bullet in the armor plate. This research is an important part of the military science supported by MHTT.

KEYWORDS:

Research and Development; Armour Protection; Armour.

## **MILITARY LAW**

Simicskó, István

## Improving protection against terrorism by broadening the categories of special legal order

ABSTRACT:

The author focuses on the causes of the 6<sup>th</sup> amendment of the Fundamental Law of Hungary. He points out the need for the implementation of „terror threat situation.” He analyses the causes of amendment, elaborates the constitutional structure of the state of emergency and shows the role of special legal order regulated by the Fundamental Law. The second part of the paper gives an international overview and presents other European countries' constitutional system, highlighting their most important features.

KEYWORDS:

Fundamental Law, terror threat, special legal order

A

# MINDENKI HADTUDOMÁNYA

című szabadegyetemi előadásorozat 2017. évi tavaszi programja

A Magyar Hadtudományi Társaság folytatja szabadegyetem jellegű előadás-sorozatát. A rendezvények minden hónap második csütörtökjén 17 órakor kezdődnek a Budapest Helyőrség Dandár Honvéd Kulturális Központjának Gobelin termében (Budapest XIV., Stefánia út 34.)

## A TERVEZETT ELŐADÁSOK:

2017. január 12.

Dr. Kis-Benedek József ny. ezredes, PhD, c. egyetemi tanár  
**Európa terror-fenyegetettsége**

2017. február 9.

Takács Attila dandártábornok  
**A Magyar Honvédség Hadkiegészítő, Felkészítő és  
Kiképző Parancsnoksága, és amivé válhat**

2017. március 9.

Prof. dr. Turcsányi Károly ny. mk. ezredes, DSc, egyetemi tanár  
**Fegyvernemek és alkalmazásuk az elöltöltő fegyverek korában**

2017. április 13.

Dr. habil Szilágyi István, DSc, egyetemi tanár  
**Geopolitikai gondolkodás és geopolitikai modellek a 21. században**

2017. május 11.

Dr. Kállai Attila alezredes, PhD, egyetemi docens  
**Zrínyi-Újvár feltárásának térképészeti munkái**

---

Az elnökség köszönetét fejezi ki mindazoknak, akik adójuk 1%-ának felajánlásával 2016-ban támogatták a Magyar Hadtudományi Társaságot, hozzájárultak eredményes tevékenységéhez.
